

1. About Me Page

Hello, my name is Tony. I am a 10th-grade student at The Browning School in New York City. My academic interests span across the sciences and public policy, driving my active participation in the Urban Barcoding Project and Public Forum debate. As a dedicated musician, I serve as Concertmaster for the Ovation Ensemble, a leadership role that has deeply enhanced my appreciation for the collaborative nature of orchestral performance. I also occasionally participate in Model UN to further explore international relations and global problem-solving. Beyond academics and music, I am a committed athlete, currently serving as captain for my school's varsity tennis team.

2. Resume / Resume-Style Page:

Visual Elements:

- Structured blocks with clear, bold headers, replicating a professional resume layout.

Education:

- The Browning School, New York City (Class of 2028)

Core Extracurricular Activities:

- Public Forum Debate: Active competitor; routinely research, draft, and present comprehensive "pro" and "con" cases on complex policy topics.
- Urban Barcoding Project: Student Researcher; engage in genetic sequencing and biodiversity research, utilizing wet-lab techniques to analyze biological samples.
- Ovation Ensemble (Orchestra): Violinist; collaborate with peers to rehearse and perform complex orchestral repertoires.
- Varsity Tennis: Team Captain
- Model UN: Delegate; participate in committee sessions and draft resolutions on global issues.

School Projects & Civic Leadership:

- Civic Policy Development: Developed and presented a comprehensive policy proposal discussing the NYC driving age, featuring economic impact analysis and graduated licensing safety frameworks.
- Engineering & 3D Design: Applied the iterative engineering design process to conceptualize, digitally model (CAD), and 3D-print a custom, functional backpack hook.
- Science/Lab Research: Executed a primary research investigation titled "Effect of Initial Solution Temperature on the Settling Rate of a Silver Chloride Precipitate."
- Civic Dialogue: Designed and facilitated a 30-minute in-class constructive dialogue session analyzing the Terry v. Ohio Supreme Court ruling.

Visual Elements:

- Categorized lists using clean iconography (e.g., a DNA helix for barcoding, a gavel for debate, a musical note for ensemble).

Technical & Laboratory Skills:

- Wet-Lab Techniques, PCR & DNA Barcoding
- Computer-Aided Design (CAD) & 3D Printing
- General Python Programming
- Data Collection and Scientific Analysis

Academic & Communication Skills:

- Public Speaking & Argumentation
 - I have extensive experience in extemporaneous speaking and formal debate. I am skilled in breaking down complex, multi-layered issues into logical "voters" for an audience, maintaining composure during high-pressure cross-examinations, and adapting my delivery style for different panel compositions.
- Policy Research, Proposal Drafting & Presentation Design
 - I am proficient in synthesizing diverse data sources, ranging from economic impact studies to legal precedents, into cohesive policy papers. I am capable of translating technical data (such as graduated licensing safety frameworks) into visually engaging presentations that drive civic engagement and clarity.

Personal/Soft Skills:

- Ensemble Collaboration & Active Listening
 - Developed through years of orchestral performance as a violinist, this involves "musical empathy." This is the ability to anticipate the timing and phrasing of peers through non-verbal cues and active listening to ensure a unified, harmonious collective output under the direction of a conductor.
- Team Leadership & Mentorship
 - As Varsity Tennis Captain and Concertmaster, I focus on fostering a culture of accountability and encouragement. This includes providing technical feedback to younger peers, managing team morale during high-stakes matches or rehearsals, and acting as a bridge between the group and the coaching staff.
- Constructive Dialogue Facilitation
 - I am trained in the art of moderated discussion on sensitive or polarized topics. I prioritize creating a "brave space" where participants feel comfortable analyzing controversial rulings (like Terry v. Ohio) through a lens of objective inquiry, ensuring all voices are heard while keeping the conversation grounded in fact and mutual respect.
